Artificial Intelligence (AI) opened a new horizon for human civilization. It is being used in different fields from detective agencies to medicines. And it has made things a lot easier than it was in the earlier days. Artificial Intelligence is basically using the knowledge of complex methods and algorithms in order to analyze things. Now how does it help in medicines and healthcare? Well, using artificial intelligence in medical fields is basically using the knowledge of complex methods and algorithms and estimating the human cognition by analyzing the complicated medical data.

More specifically or precisely, Artificial Intelligence in the medical field is the concluding medical state by analyzing the complicated medical data with a computer algorithm.

Assessment of Learning Outcomes in Higher Education Pan Macmillan

A searing novel, told in letter form, that explores the South African legacy of apartheid through the lens of a woman whose Black son has just murdered a white woman Mother to Mother is a novel with depth, at once an emotional plea for compassion and understanding, and a sharp look at the impacts of colonialism and apartheid on South African families. Inspired by the true story of Fulbright scholar Amy Biehl's murder, the book takes the form of a letter to the victim's mother.

The murderer's mother, Mandisa, speaks of a life marked by oppression and injustice. Through her writing, Mandisa reveals a colonized society that not only allowed but perpetuated violence against women and impoverished Black South Africans under the reign of apartheid. This book is not an apology for the murder but rather something more. It seeks to connect, through empathy and storytelling, one pained mother with another who is grief-stricken and in mourning. A beautifully written exploration of the society that bred such violence, *Mother to Mother* will resonate with readers interested in understanding and ending racial injustice, as well as the lasting colonial foundations of oppression.

The authors highlight key conceptual and methodological challenges connected with intra-national and cross-national assessment of learning outcomes in higher education; introduce novel approaches to improving assessment, evaluation, testing, and measurement practices; and offer exemplary implementation frameworks. Further, they examine the results of and lessons learned from various recent, world-renowned research programs and feasibility studies, and present results from their own studies to provide new insights into how to draw valid conclusions about learning outcomes achieved in various contexts.

**Falling Man** Farrar, Straus and Giroux

Falling Man begins on September 11, in the smoke and ash of the burning towers. In the days and the years following, we trace the aftermath of this global tremor in the private lives of a few reticulated individuals. Theirs are lives choreographed by loss, by grief and by the enormous force of history. From these intimate portraits, Don DeLillo shifts to an extrapolated vision: he charts the way the events have reconfigured our emotional landscape, our memory and our perception of the world. Falling Man is an unforgettable novel, at once cathartic and beautiful and heartbreaking.

**Beyond the Blue Border** Springer Nature

'Set at a time of lengthening shadows, this is a novel about the sparks that illuminate the dark: of wisdom, compassion, defiance and courage. It is wry, piercing and also, fittingly, radiant.' Daily Mail From Robert Seethaler, the author of the Man Booker International shortlisted *A Whole Life*, comes a deeply moving story of ordinary lives profoundly affected by the Third Reich, in the tradition of novels such as Fred Uhlman's classic *Reunion*, Bernhard Schlink's *The Reader* and Rachel Seiffert's *The Dark Room*. When seventeen-year-old Franz exchanges his home in the idyllic beauty of the Austrian lake district for the bustle of Vienna, his homesickness quickly dissolves amidst the thrum of the city. In his role as apprentice to the elderly tobacconist Otto Trnsnyek, he will soon be supplying the great and good of Vienna with their newspapers and cigarettes. Among the regulars is a Professor Freud, whose predilection for cigars and occasional willingness to dispense romantic advice will forge a bond between him and young Franz. It is 1937. In a matter of months Germany will annex Austria and the storm that has been threatening to engulf the little

tobacconist will descend, leaving the lives of Franz, Otto and Professor Freud irredeemably changed.

**Implementing Change** Springer Nature

A seminal work as melodious and haunting as the era it chronicles. First published in 1968, *Weimar Culture* is one of the masterworks of Peter Gay's distinguished career. A study of German culture between the two wars, the book brilliantly traces the rise of the artistic, literary, and musical culture that bloomed ever so briefly in the 1920s amid the chaos of Germany's tenuous post-World War I democracy, and crashed violently in the wake of Hitler's rise to power. Despite the ephemeral nature of the Weimar democracy, the influence of its culture was profound and far-reaching, ushering in a modern sensibility in the arts that dominated Western culture for most of the twentieth century. Vivid and eminently readable, *Weimar Culture* is the finest introduction for the casual reader and historian alike.

Alcohol and nicotine addiction mostly occur together. Over the last ten years therapeutic aspects and motivational strategies have been considerably improved. Hence, groups and subgroups have been defined and can be treated with specific medication and tailor-made psychotherapies, leading in the long term to considerably better and more effective results than the once broadly applied, rigorous abstinence-based therapies. However, alcohol and nicotine addiction still represent major medical and social problems. In this book, new therapeutic approaches are comprehensively described, outlining the different interactions between personality, environment and the effects of the substance. In addition to prevention-based therapies and diagnosis, essential psychological and sociological strategies, as well as medication-based therapies, are also presented in detail. All of these therapies have realistic aims and are of global validity. In addition, the book provides a broad overview of the American and European epidemiology of alcohol and nicotine addictions. The book is written for all those who care for and offer professional therapy for alcohol and nicotine-addicted patients.

But then suddenly, and terribly, it does - Hanna is not only obliged to answer for a horrible crime, she is also desperately concealing an even deeper secret. **Vom Nachdenken zum Vordenken** Beacon Press

A classic, prize-winning novel about an epic migration and a lone woman haunted by the past in frontier Waipu. In the 1850s, a group of settlers established a community at Waipu in the northern part of New Zealand. They were led there by a stern preacher, Norman McLeod. The community had followed him from Scotland in 1817 to found a settlement in Nova Scotia, then subsequently to New Zealand via Australia. Their incredible journeys actually happened, and in this winner of the New Zealand Book Awards, Fiona Kidman breathes life and contemporary relevance into the facts by creating a remarkable fictional story of three women entangled in the migrations - Isabella, her daughter Annie and granddaughter Maria. McLeod's harsh leadership meant that anyone who ran counter to him had to live a life of secrets. The 'secrets' encapsulated the spirit of these women in their varied reactions to McLeod's strict edicts and connect the past to the present and future. Charlesbridge Publishing

While access to schooling has expanded around the world, many countries have not realised the hoped-for improvements in economic and social well-being. Access to education by itself is an incomplete goal for development; many students leave the education system without basic proficiency in literacy and numeracy. As the world coalesces around new sustainable development targets towards 2030, the focus in education is shifting towards access and quality. Using projections based on data from the OECD Programme for International Student Assessment (PISA) and other international student assessments, this report offers a glimpse of the stunning economic and social benefits that all countries, regardless of their national wealth, stand to gain if they ensure that every child not only has access to education but, through that education, acquires at least the baseline level of skills needed to participate fully in society.

**Weimar Culture: The Outsider as Insider** Hachette UK

A scandalous exploration of elite undergraduate life from the author of *The Bonfire of the Vanities* Dupont University: the Olympian halls of learning housing the cream of America's youth, the roseate Gothic spires and manicured lawns suffused with tradition... or so it appears to beautiful, brilliant Charlotte Simmons, a sheltered freshman from Sparta, North Carolina, who has come here on a full scholarship. But Charlotte soon learns that for the upper-crust coeds of Dupont, sex, status, and kegs trump academic achievement every time. As Charlotte encounters Dupont's elite, she gains a new, revelatory sense of her own power, that of her difference and of her very innocence. But little does she realise that she will act as a catalyst in all of their lives. 'A firecracker

of a novel... A pyrotechnic delight just as dazzling as *The Bonfire of the Vanities*' - Sunday Express  
*Jorge Ishizawa* Waxmann Verlag  
Hanna and Andreas will do anything to leave oppressive East Germany behind. There's one escape route open to them, but can they survive it? Hanna and Andreas have always been friends. When

they're expelled from school for activism directly challenging the socialist state in East Germany, they end up doing factory work. But what kind of life do they have to look forward to without education or opportunity? Especially when they aren't allowed a voice? The choice to risk imprisonment or death by escaping to the democratic West seems like a risk worth taking. They set out to swim twenty-five hours across the choppy waters of the Baltic Sea. Linke's storytelling

achieves a delicate balance between heightened moments of danger--searchlights, jellyfish, a Russian helicopter, a violent summer storm--and the monotony, ineffable fatigue, physical pain, cramping, fear, and hope that fill the rest of the journey. A memorable tale of two people risking all for a chance at freedom.
