Vernacular Architecture In The 21st Century Theory Downloaded from amsd.per.gov.i by guest

LAWRENCE BARTLETT

The Contemporary House Cambridge University Press
 This book contains papers presented at the second International Conference on Eco-Architecture. The original Conference was the first to be held worldwide on the subject of sustainable architecture in order to define what ECO-ARCHITECTURE actually is, i.e. "Harmonisation between Architecture and Nature." The subject has matured in the two years between conferences and the submitted papers can be categorised into Ecological and Cultural Sensitivity, Design with Nature, Resource Conservation and Building Technology, Design by Passive Systems, Case Studies, Rehabilitation and Adaptive Re-use. The affiliations of the authors whether in academia, the professions or industry indicate the very wide international scope and the interdisciplinary nature of the subject.

21st Century House Taylor & Francis

The Biennial of Architectural and Urban Restoration is composed by a series of cultural events like seminars, shows, art exhibitions, projections of documentaries, debates, visits, all open and also aimed to the public. The purpose of these activities is to bring out the architectural and urban local heritage and raise public awareness to its protection, creating an international forum of discussion between countries with similar problems, but various economic and socio-political situations.

Design Patterns and Living Architecture Papadakis Dist A/C
 Niger is sand, light, and heat. Starting from the necessity of the Mission Catholique du Dosso, which has worked in Niger for several years, this book speaks about the Nigerien situation which is characterized by a countrywide spread of poverty. Along with studying the country's environmental, geographical conditions, the book discusses raw earth architecture in both vernacular and contemporary contexts. A number of the most common techniques are described. The possibilities for these methods to adapt to the contemporary language of architecture without losing the technical and physical benefits inherent in them are illustrated. The book embraces some topics that are not common but highly relevant in the Developing World, such as identity through the evolution of architecture and the value of transmitting knowledge related to the vernacular building process. Nowadays, Niger's condition is characterized by a lack of resources, both physical and cultural. Earthen technology appears to be a valid solution in this situation for the creation of an environmentally sustainable approach. The book aims to provide an overview of the possibility of constructing new buildings related to the climate and traditional context, applying vernacular

technology and solutions in a contemporary application. Providing a balance between teaching vernacular knowledge and the contemporary architectural language could help face this out-of-resource situation, aiming to get comfortable and affordable living spaces.

Eco-architecture II Springer

The issues surrounding the function and meaning of vernacular architecture in the twenty-first century are complex and extensive. Taking a distinctively rigorous theoretical approach, this book considers these issues from a number of perspectives, broadening current debate to a wider multidisciplinary audience. These collected essays from the leading experts in the field focus on theory, education and practice in this essential sector of architecture, and help to formulate solutions to the environmental, disaster management and housing challenges facing the global community today.

Harmonisation Between Architecture and Nature CRC Press

"Collection of contemporary residential designs seen across the United States today ... [with] residential designs by leading architects from across the United States, illuminated with rarely seen photographs and detailed plans, and underlines the sensitivity of today's architects to the natural environment, as well as the care and attention paid to interior design and everyday living. Each project illustrates how architects adapt their designs to accommodate the challenges posed by the local topography and variations in climate, along with a sharp focus on optimum strategies for sustainable living, be it across small, boutique projects, to large-scale, luxury abodes"--provided by publisher.

Modern Architecture Springer

Shingle Style flourished in the Gilded Age environs of Newport, Rhode Island, during the 1880s. The setting for the film "High Society," and the location of John F. Kennedy's wedding, it continues to enchant residents and visitors alike with an unparalleled concentration of carefully preserved architecture. With asymmetrical wood frames and shingled stories set dramatically on stone foundations, these romantic homes were intended to blend in with the surrounding landscape, creating a unified look, while at the same time incorporating fantastical elements such as gables, brick and stone chimneys, bands of small-paned windows, turrets, columns, and pediments. Recently, American vernacular architecture has witnessed a renaissance, as impressive new Shingle Style homes are built alongside those that have presided along the rugged Rhode Island coastline for more than a century. This collection of 15 homes, showcased with full-color photos and evocative text, represents the best of Newport Shingle Style — now and then.

A Guidebook for His Students to this Field of Art Images Publishing

There is no one way to design a modern urban house. Demand for space in cities the world over is higher than ever and new buildings must meet stringent energy saving requirements and negotiate a myriad planning regulations. But the best new urban architecture suggests invention and innovation are as critical as ever. The Contemporary House brings together seventy solutions, drawn from cities around the globe to explore the many ways in which architecture can enhance the experience of living in the city. Organized geographically, The Contemporary House offers a fascinating insight into the sheer variety of contemporary approaches to urban design, from reinventions of longstanding vernacular forms like terraces and townhouses, through to the fastchanging suburbs and inner cities of modern Japan, where the short lifespan of family houses provides architects with a template for aesthetic and technical experimentation. The book also provides an insight into the conditions that shape the architecture of some of the world's major cities, through recent history, signature styles, and current conditions on the ground. The Contemporary House is an essential guide to design in the modern city.

proceedings: international conference and summer school 2007 CRC Press

The study of vernacular architecture explores the characteristics of domestic buildings in particular regions or localities, and the many social and cultural factors that have contributed to their evolution. In this book, vernacular architecture specialist Paul Oliver brings together a wealth of information that spans over two decades, and the whole globe. Some previously unpublished papers, as well as those only available in hard to find conference proceedings, are brought together in one volume to form a fascinating reference for students and professional architects, as well as all those involved with planning housing schemes in their home countries and overseas.

Built to Meet Needs: Cultural Issues in Vernacular Architecture Gibbs Smith

Local communities have adapted for centuries to challenging surroundings, resulting from unforeseen natural hazards. Vernacular architecture often reveals very intelligent responses attuned to the environment. Therefore, the question that emerged was: how did local populations prepare their dwellings to face frequent earthquakes? It was to respond to this gap in knowledge, that the SEISMIC-V research project was instigated, and this interdisciplinary international publication was prepared. The research revealed the existence of a local seismic culture, in terms of reactive or preventive seismic resistant measures, able

to survive, if properly maintained, in areas with frequent earthquakes. The fundamental contribution and aims of the publication were to enhance: -The disciplinary interest in vernacular architecture; -Its contribution to risk mitigation in responding to natural hazards; -To encourage academic and scientific research collaboration among different disciplines; -To contribute to the improvement of vernacular dwellings, which half of the world's population still inhabits nowadays. Fifty international researchers and experts presented case studies from Latin America, the Mediterranean, Eastern and Central Asia and the Himalayas region, with reference to 20 countries, i.e. Algeria, Bolivia, Bhutan, Chile, China, Egypt, El Salvador, Greece, Haiti, Italy, Japan, Mexico, Morocco, Nepal, Nicaragua, Peru, Romania, Taiwan, Turkey and a closer detailed analysis of Portugal. This publication brings together 43 contributions, with new perspectives on seismic retrofitting techniques and relevant data, addressing vernacular architecture; an amazing source of knowledge, and to this day, home to 4 billion people.

Buildings and Landscapes 21. 1Pb Springer

In the search for sustainable architecture, there is growing interest in the relationship between nature and design. In this vital new book, the term bioclimatic, relating to the dynamic between climate and living organisms, is applied by the authors in focusing on countries where housing requires cooling for a significant part of the year. In this context, Bioclimatic Housing covers creative, vernacular architecture to present both the theory and practice of innovative, low-energy architecture. The book interweaves the themes of social progress, technological fixes and industry transformation within a discussion of global and country trends, climate types, solutions and technologies.

Prepared under the auspices of a 5-year International Energy Agency (IEA) project, and with case studies from Iran, Malaysia, Australia, Japan, Sri Lanka and Italy, this is a truly international and authoritative work, providing an essential primer for building designers, builders, developers and advanced students in architecture and engineering.

Design by Radical Indigenism Routledge

Embracing a biological and evolutionary perspective to explain the human experience of place, Urban Experience and Design explores how cognitive science and biometric tools provide an evidence-based foundation for architecture and planning. Aiming to promote the creation of a healthier and happier public realm, this book describes how unconscious responses to stimuli, outside our conscious awareness, direct our experience of the built environment and govern human behavior in our surroundings. This collection contains 15 chapters, including contributions from researchers in the US, the UK, the Netherlands, France and Iran. Addressing topics such as the impact of eye-tracking analysis and seeing beauty and empathy within buildings, Urban Experience and Design encourages us to reframe our understanding of design, including the narrative of how modern architecture and planning came to be in the first place. This volume invites students, academics and scholars to see how cognitive science and biometric findings give us remarkable 21st-century metrics for evaluating and improving designs, even before they are built.

Reframing the Vernacular: Politics, Semiotics, and Representation

W. W. Norton & Company

In an era of high-tech and climate extremes, we are drowning in information while starving for wisdom. Enter Lo--TEK, a design movement building on indigenous philosophy and vernacular

infrastructure to generate sustainable, resilient, nature-based technology. With a foreword by anthropologist Wade Davis and spanning 18 countries from Peru to...

Contemporary Perspectives on Improving the Public Realm CICOP Italia

Looking at diverse visions of the modern house, before placing them in the context of the technological and aesthetic concerns of architects, this text features illustrations and architectural drawings for every project, covering various aspects of contemporary house architecture.

Contemporary Vernacular Design Routledge

Projecting forward in time from the processes of design and construction that are so often the focus of architectural discourse, Consuming Architecture examines the variety of ways in which buildings are consumed after they have been produced, focusing in particular on processes of occupation, appropriation and interpretation. Drawing on contributions by architects, historians, anthropologists, literary critics, artists, film-makers, photographers and journalists, it shows how the consumption of architecture is a dynamic and creative act that involves the creation and negotiation of meanings and values by different stakeholders and that can be expressed in different voices. In so doing, it challenges ideas of what constitutes architecture, architectural discourse and architectural education, how we understand and think about it, and who can claim ownership of it. Consuming Architecture is aimed at students in architectural education and will also be of interest to students and researchers from disciplines that deal with architecture in terms of consumption and material culture.

Modernity and Sustainability for 21st Century Architecture CRC Press

Vernacular - or traditional - architecture encompasses most of the buildings of the world. This encyclopedia is the first to show the remarkable diversity of the buildings constructed and lived in by the people of over a thousand cultures. The first of the three volumes focuses on the theories, principles and philosophy that underpin traditional architecture. Volumes 2 and 3 consider these principles within specific cultural and societal contexts. As building traditions vary widely within some countries and extend across the political boundaries of others, the encyclopedia considers vernacular architecture within its cultural rather than its national contexts. Richly illustrated with photographs, line drawings and maps, the work is also supported by a glossary, a lexicon, and the largest bibliography on the subject ever published. This work will be an inspiration and resource for architects, anthropologists, folklorists and geographers, and important for all who help shape housing and conservation policies.

Techniques and technologies for sustainability Vernacular

Architecture in the 21st Century Theory, Education and Practice

An important and fascinating collection of original projects by unique thinkers in the world of architecture and spatial design Architectural practice today goes far beyond the design and construction of buildings -- the most exciting, forward-thinking architecture is also found in digital landscapes, art, apps, films, installations, and virtual reality. This remarkable book features projects -- surprising, beautiful, outrageous, and sometimes even frightening -- that break rules and shatter boundaries. In this timely book, the work of award-winning architects, designers,

artists, photographers, writers, filmmakers, and researchers -- all of whom synthesize and reflect our spatial environments -- comes together for the first time.

Vernacular Architecture in the 21st Century CRC Press

Developing and maintaining a disciplined management system provides any organization with a blueprint for exceptional performance and success. Indeed, for larger multinational corporations, a management system is a critical component for sustainable growth and performance management. In this book, the authors discuss a series of fundamentals for creating an operationally excellent management system (OEMS). The book also examines the business performance impact of an OEMS across leading gas and oil organizations, such as Exxon Mobil, BP, Suncor, and Chevron. In 7 Fundamentals of an Operationally Excellent Management System, the authors discuss each fundamental in detail and provide the supporting training and workshop materials that are essential for integrating these fundamentals into the business processes of the organization. The seven fundamentals identified by the authors provide a sequential approach for developing and executing an OEMS across any organization. Integrating sound organizational and business practices with personnel and process safety management principles, the book is an invaluable resource for organizations seeking operational discipline and excellence. Well-supported with graphics and practical examples, the book provides a simple pathway for an organization to evolve its management system into an OEMS designed to reduce workplace incidents and improve business performance on a sustainable basis. The management system principles discussed in the book are intended for the business leader who is motivated to transition his or her organization from ordinary, through best in class, to an organization of world-class stature and performance.

Buildings and Landscapes 21. 2Pb Univerlagtuberlin

These collected essays from leading experts in the field focus on theory, education and practice in this essential sector of architecture, and help to formulate solutions to the challenges facing the global community today.

Vernacular Architecture in the 21st Century Oxford University Press

The aim of this book is to reflect on "vernacularity" and culture. It concentrates on two major domains: first it attempts to reframe our understanding of vernacularity by addressing the subject in the context of globalisation, cross-disciplinarity, and development, and second, it discusses the phenomenon of how vernacularity has been treated, used, employed, manipulated, practiced, maintained, learned, reconstructed, preserved and conserved, at the level of individual and community experience. Scholars from a wide variety of knowledge fields have participated in enriching and engaging discussions, as to how both domains can be addressed. To expedite these aims, this book adopts the theme "Reframing the Vernacular: Politics, Semiotics, and Representation", organised around the following major sub-themes: • Transformation in the vernacular built environment • Vernacular architecture and representation • The meaning of home • Symbolic intervention and interpretation of vernacularity • The semiotics of place • The politics of ethnicity and settlement • Global tourism and its impacts on vernacular settlement • Vernacular built form and aesthetics • Technology and construction in vernacular built forms • Vernacular language - writing and oral traditions
