Emergent literacy skills
Emerald Group Publishing
Designed for speech-
language pathologists to
enhance emergent
literacy intervention for
preschool and
kindergarten-age children,
this book includes 90
lessons addressing key
areas of emergent
literacy: phonological
awareness, print
concepts, alphabet
knowledge, emergent
writing, inferential
language, and vocabulary.
These lessons are suitable
for use in clinical settings
as well as in collaboration
with classroom teachers.

Prekindergarten is one of
the most hotly contested
topics in American
education today. The
author looks at recent
social and educational
changes that have
brought unprecedented
attention to school
readiness, the hazy
boundary between
preschool and child care,
and the extent to which
American youngsters
already have access to
various pre-K services. He
then examines the shaky
state of standards and

quality in this field and
the largely inconclusive
nature of research and
evidence as to "what
works" with young
children. After reviewing
of two of America's most
prominent examples of
universal pre-K education
in Florida and Oklahoma
and looking at the four-
decade-old Head Start
Program, he tackles the
matter of costs and
benefits and the fractious
issue of alternative
delivery systems before
offering some conclusions
and ideas for the path
ahead.

Introductory Skills Book IAP

Bringing together
prominent scholars, this
book shows how 21st-
century research and
theory can inform
everyday instructional
practices in early
childhood classrooms
(PreK-3). Coverage
includes foundational
topics such as alphabet
learning, phonological
awareness, oral language
development, and
learning to write, as well
as cutting-edge topics
such as digital literacy,
informational texts, and
response to intervention.
Every chapter features
guiding questions; an
overview of ideas and
findings on the topic at
hand; specific suggestions

for improving instruction,
assessment, and/or the
classroom environment;
and an engrossing
example of the practices
in action.

Teaching Resources

This book offers current international initiatives, developed for working with children from "Birth to Eight" by a diverse group of noted professional authors.

Their readings present an overview of early education as it evolved from the Froebelian kindergarten to today's practices in various Early Education settings around the globe. The

international voices of the authors represent a balanced perspective of happenings in various nations and lend a conversational approach to each chapter. The

chapters analyze the Universal Preschool Education movement promoted by various countries, states, and agencies; examine model curriculum programs in a variety of

teaching/learning settings; and identify directions the community

can take in promoting effective early education programs. Particular attention is given to key issues and concerns faced by practitioners and families world-wide.

Studies reveal successful approaches to bilingual education in a Chilean kindergarten, research findings on gender differences in primary school girls for learning science in Wales, literacy development strategies for teaching in UK multicultural classrooms and childhood centres, the process of integration special education with early childhood practices in China, and exemplars of community outreach to improve the well being of children through advocacy for governmental changes in early education policies and professional development. This book is for everyone interested in the well being of young children moving forward in a global age to meet the challenges of early citizenship in their world.

Over the last quarter century, educational leadership as a field has developed a broad strand of research that engages issues of social justice, equity and diversity. This

effort includes the work of many scholars who advocate for a variety of equity-oriented leadership preparation approaches.

Critical scholarship in Education Administration and Educational Politics is concerned with questions of power and in various ways asks questions around who gets to decide. In this volume, we ask who decides how to organize schools around criteria of ability and/or disability and what these decisions imply for leadership in schools. In line with this broader critical tradition of inquiry, this volume seeks to interrogate policies, research and personnel preparation practices which constitute interactions, discourses, and institutions that construct and enact ability and disability within the disciplinary field of education leadership. To do so, we present contributions from multidisciplinary perspectives. The volume is organized around four themes: 1. Leadership and Dis/Ability: Ontology, Epistemology, and Intersectionalities; 2. Educational Leaders and Dis/ability: Policies in Practice; 3. Experience and Power in Schools; 4. Advocacy, Leverage, and

the Preparation of School Leaders. Intertwined within each theme are chapters, which explore theoretical and conceptual themes along with chapters that focus on empirical data and narratives that bring personal experiences to the discussion of disabilities and to the multiple ways in which disability shapes experiences in schools. Taken as a whole, the volume covers new territory in the study of educational leadership and dis/abilities at home, school, and work.

[Best Practices in Early Literacy Instruction](#) Pro-Ed
Discusses professional development in several contexts, children's understandings and programs for children. This book should give the reader an idea of the range of work that is being done around the globe. It brings together insider perspectives on early education in different contexts.

[World Class Initiatives and Practices in Early Education](#) Anchor Books
An Emergent Literacy Workbook for Preschool-Kindergarten. This

Education Workbook and Activity book will help Parents and Educators engage young children in learning activities that strengthen early literacy skills. The first words that many children learn to read are CVC (consonant-vowel-consonant) words. These words are easily learned by children once they can recognize the alphabet and letter sounds. It is important to first teach children to distinguish the sounds of letters before teaching them how to string these sounds together to make words. This workbook is put together in an easy format for young children to learn and a non-complicated format for parents and educators to facilitate learning.

Emergent Literacy Plus Plural Publishing
Emergent Literacy Curriculum uses thematic units, phonemic awareness, phonological awareness, nursery rhymes, math skills, performing arts, and basic learning strategies to develop the whole child and educate the young mind, specifically Kindergarteners. It is an amazing resource for

educators and caregivers.

Emergent Literacy

This book is about young children and their writing and reading development during their first few years of life. It stops at the point where most books on beginning writing and reading start: when the child is 5-6 years old and is able to write and read in ways recognized as actually being writing and reading. The chapters are authored by many of the leading researchers of written language development in very young children.

Early Literacy Skills Builder

Explores the early behaviors associated with literacy development, known as emergent literacy.
